

Discussion P1 - Tutorial

1. Show the work

- 

2. Explain the process - How I did it?

First I took a picture of a fountain in the Brentwood area. Then I used a tripod and a remote to take a picture of myself. I used my phone to take both pictures.

Later, I transferred both pictures to Photoshop. I used the fountain image as my background layer. Then I used the Polygonal Lasso Tool to outline myself. After I used the Spot Healing Brush Tool to uncover my legs. Lastly, I used the Eraser Tool to remove the unnecessary background.

3. Explain the concept - what was the idea?

For this assignment, I wanted to explain a part of myself and represent who I am and what I have been through. I was thinking about life and the future. I also wanted to showcase nature, with the tree as a living being. I added my picture on top of the tree as I wanted to show the impossible. I wanted to show my imagination and how it revolves around all the things I do.
